

CONCRETE CLEANER

- *Heavy Duty
- *Water Based
- *Suitable for food contact
(Wash off before use).
- *Leaves no residue
- *Non Flammable
- *Highly Alkaline
- *Odourless
- *Concentrated
- *Value for Money
- *Bio-Degradable
- *For Domestic or
Commercial use

DESCRIPTION

Right Choice's Concrete Cleaner is a water based solvent degreaser especially formulated to remove heavy grease, from any badly soiled surface. It leaves no residue, replacing flammable, solvent based products

Concrete Cleaner is bio degradable and odourless and can penetrate quickly into soiled areas, removing dirt and grease from metal, concrete and other hard surface situations. It can be used in machinery workshops, on vehicle engines, in engineering plants, in garages, and on concrete floors.

Concrete Cleaner can be used prior to painting as it will remove chalkiness from deteriorated painted surfaces, leaving no residue so it can be painted over with no effect. It is highly alkaline and should not be used on reactive metals such as aluminium.

DIRECTIONS

Product can be used neat or diluted through with up to 40 parts water, depending on the surface to be cleaned and the degree of contamination of the soiled surface. Solution is best applied by spray, mopping or brushing onto the surface to be cleaned. Allow sufficient time for penetration. Agitation will assist in heavily soiled conditions. Wipe or rinse off cleaned areas for best results.

DISCLAIMER

Industry standards recommend the accurate recording of times and dates, batch numbers, consumption rates and environmental conditions including substrate and air temperatures, humidity levels and dew point readings during both the application and curing processes. Full material warranties cannot be provided unless all the relevant data has been recorded accurately. The technical information and application advice given here is based on the best information available at the time of print. As the information herein is of a general nature, no assumption can be made as to the products suitability for a particular use or application. Field support, where provided, does NOT constitute supervisory responsibility. Suggestions made by Right Choice either verbally or in writing may be followed, modified or rejected by the owner, engineer or contractor since they are responsible for carrying out procedures appropriate to a specific application. If in doubt contact the Right Choice technical department for advice.
