

AQUA PRIME

- *Primer/Sealer
- *Water Based
- *Suitable for food contact
- *Easy to use
- *Fast Drying
- *Non Flammable
- *Odourless
- *Concentrated
- *Value for Money
- *Bio-Degradable
- *For Domestic or Commercial use

DESCRIPTION

Right Choice's Aqua Prime is a concentrate water based primer/sealer especially formulated for use as a primer under the Right Choice Non Slip Paint, Water Based Epoxy or the Epoxy Flake Flooring Kit.

It is used to penetrate concrete and masonry surfaces and form a barrier to eliminate sink back of subsequent top coats and can be used on plain concrete, concrete pavers, sandstone and limestone.

Aqua Prime is sold in a 1ltr concentrate and is mixed with 9ltrs of water. The coverage rate is approximately 6-8m² per ltr of mixed product (porosity dependent), therefore 1ltr of concentrate is enough primer for 60m² - 80m² of substrate.

DIRECTIONS

New concrete surfaces should be allowed to cure for 28 days. Surface should be free of grease, oil, dirt, efflorescence, laitance and paint. Heavily contaminated surfaces should be degreased. Ensure surface is clean, dry and dust free after cleaning. Any cracks should be repaired using Crack Repair, please consult TDS for application details.

Concrete surfaces that have been previously sealed must have all previous coatings removed. When ready to apply Aqua Prime, mix 1 Litre of Aqua Prime to 9 Litres of water.

DISCLAIMER

Industry standards recommend the accurate recording of times and dates, batch numbers, consumption rates and environmental conditions including substrate and air temperatures, humidity levels and dew point readings during both the application and curing processes. Full material warranties cannot be provided unless all the relevant data has been recorded accurately. The technical information and application advice given here is based on the best information available at the time of print. As the information herein is of a general nature, no assumption can be made as to the products suitability for a particular use or application. Field support, where provided, does NOT constitute supervisory responsibility. Suggestions made by Right Choice either verbally or in writing may be followed, modified or rejected by the owner, engineer or contractor since they are responsible for carrying out procedures appropriate to a specific application. If in doubt contact the Right Choice technical department for advice.
